JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 33, No. 6, November–December 1996

1996 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 892–896, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 897 and 898, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 899–902, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1996, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 903, lists the books reviewed during 1996, the author, publisher, reviewer, and the issue, number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Grid Fin Aerodynamics for Missile Applications in Subsonic Flow **A96-005**
Flap Efficiency and Heating of a Winged Re-Entry Vehicle **A96-026**
Draining of Liquid from Tanks of Square or Rectangular Cross Sections **A96-048**
Numerical Study of Multidirectional-Curvature Waverider with Finlets **A96-077**
Computational Study of Supersonic Lateral Jet Flow Interactions **A96-104**
Navier–Stokes Calculations for Rotating Configurations: Implementation for Rockets **A96-122**

Aerospace Plane

Numerical Study of Multidirectional-Curvature Waverider with Finlets **A96-077**

Civil Missions and Transportation

Numerical Study of Multidirectional-Curvature Waverider with Finlets **A96-077**

Configuration Design

Grid Fin Aerodynamics for Missile Applications in Subsonic Flow **A96-005**

Flight Mechanics

Computation of the Roll Characteristics of a Finned Projectile **A96-124**

Vibration

Damping Augmentation for Three-Cable Suspension System for Structural Testing **A96-043**

Weather Hazards

Martian Surface Wind Speeds Described by the Weibull Distribution **A96-121**

Energy

Solar Power

Data Analysis and Model Comparison for Solar Array Module Plasma Interactions Experiment **A96-068**
Dual Fuel Solar Thermal Stage: Ideal Analysis **A96-120**
Alignment and Initial Operation of an Advanced Solar Simulator **A96-140**

Wind Power

Martian Surface Wind Speeds Described by the Weibull Distribution **A96-121**

Fluid Dynamics

Aeroacoustics

Experimental and Numerical Study of Hypersonic Forward-Facing Cavity Flow **A96-055**

Boundary Layers and Heat Transfer—Laminar

Comparison of Catalytic Wall Conditions for Hypersonic Flow **A96-099**

Boundary Layers and Heat Transfer—Turbulent

Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions **A96-098**

Boundary-Layer Stability and Transition

Numerical Investigation of Laminar-Turbulent Transition on Re-Entry Capsules **A96-049**

Computational Fluid Dynamics

Code Validation for High-Speed Flow Simulation Over Satellite Launch Vehicle **A96-002**
Grid-Resolved Analysis of Base Flowfield for Four-Engine Clustered Nozzle Configuration **A96-003**
Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics **A96-025**
Flap Efficiency and Heating of a Winged Re-Entry Vehicle **A96-026**
Cone-Derived Waverider Flowfield Simulation Including Turbulence and Off-Design Conditions **A96-027**
Computational Fluid Dynamics Validation Using Multiple Interferometric Views of a Hypersonic Flowfield **A96-050**
Supersonic Base-Flow Computation Using Higher-Order Closure Turbulence Models **A96-058**
Computational Pollutant Environment Assessment from Propulsion-System Testing **A96-060**
Compressibility and Pressure-Gradient Correction Assessment for Turbulent Hypersonic Flows **A96-069**
Hypersonic Aerodynamic Characteristics of a Proposed Single-Stage-to-Orbit Vehicle **A96-074**
Launch-Vehicle Simulations Using a Concurrent, Implicit Navier–Stokes Solver **A96-096**
Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions **A96-098**
Computational Study of Supersonic Lateral Jet Flow Interactions **A96-104**
Numerical Study of Low-Thrust Nozzles for Satellites **A96-110**
Hypersonic Nonequilibrium Parallel Multiblock Navier–Stokes Solver **A96-118**
Lower–Upper Symmetric Gauss–Seidel Scheme Exhibiting Asymmetric Vortices over Slender Bodies **A96-119**
Computation of the Roll Characteristics of a Finned Projectile **A96-124**

Hydrodynamics

Gravitational Effects on Closed-Cellular-Foam Microstructure **A96-039**
Navier–Stokes Calculations for Rotating Configurations: Implementation for Rockets **A96-122**

Hypersonic Flow

Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics **A96-025**
Flap Efficiency and Heating of a Winged Re-Entry Vehicle **A96-026**
Model for Predicting Hypersonic Laminar Near-Wake Flowfields **A96-045**
Numerical Investigation of Laminar-Turbulent Transition on Re-Entry Capsules **A96-049**

Computational Study of Supersonic Lateral Jet Flow Interactions **A96-104**
Navier–Stokes Calculations for Rotating Configurations: Implementation for Rockets **A96-122**

Aerospace Plane

Numerical Study of Multidirectional-Curvature Waverider with Finlets **A96-077**

Civil Missions and Transportation

Numerical Study of Multidirectional-Curvature Waverider with Finlets **A96-077**

Configuration Design

Grid Fin Aerodynamics for Missile Applications in Subsonic Flow **A96-005**

Flight Mechanics

Computation of the Roll Characteristics of a Finned Projectile **A96-124**

Vibration

Damping Augmentation for Three-Cable Suspension System for Structural Testing **A96-043**

Weather Hazards

Martian Surface Wind Speeds Described by the Weibull Distribution **A96-121**

Energy

Solar Power

Data Analysis and Model Comparison for Solar Array Module Plasma Interactions Experiment **A96-068**
Dual Fuel Solar Thermal Stage: Ideal Analysis **A96-120**
Alignment and Initial Operation of an Advanced Solar Simulator **A96-140**

Wind Power

Martian Surface Wind Speeds Described by the Weibull Distribution **A96-121**

Fluid Dynamics

Aeroacoustics

Experimental and Numerical Study of Hypersonic Forward-Facing Cavity Flow **A96-055**

Boundary Layers and Heat Transfer—Laminar

Comparison of Catalytic Wall Conditions for Hypersonic Flow **A96-099**

Boundary Layers and Heat Transfer—Turbulent

Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions **A96-098**

Boundary-Layer Stability and Transition

Numerical Investigation of Laminar-Turbulent Transition on Re-Entry Capsules **A96-049**

Computational Fluid Dynamics

Code Validation for High-Speed Flow Simulation Over Satellite Launch Vehicle **A96-002**
Grid-Resolved Analysis of Base Flowfield for Four-Engine Clustered Nozzle Configuration **A96-003**
Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics **A96-025**
Flap Efficiency and Heating of a Winged Re-Entry Vehicle **A96-026**
Cone-Derived Waverider Flowfield Simulation Including Turbulence and Off-Design Conditions **A96-027**
Computational Fluid Dynamics Validation Using Multiple Interferometric Views of a Hypersonic Flowfield **A96-050**
Supersonic Base-Flow Computation Using Higher-Order Closure Turbulence Models **A96-058**
Computational Pollutant Environment Assessment from Propulsion-System Testing **A96-060**
Compressibility and Pressure-Gradient Correction Assessment for Turbulent Hypersonic Flows **A96-069**
Hypersonic Aerodynamic Characteristics of a Proposed Single-Stage-to-Orbit Vehicle **A96-074**
Launch-Vehicle Simulations Using a Concurrent, Implicit Navier–Stokes Solver **A96-096**
Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions **A96-098**
Computational Study of Supersonic Lateral Jet Flow Interactions **A96-104**
Numerical Study of Low-Thrust Nozzles for Satellites **A96-110**
Hypersonic Nonequilibrium Parallel Multiblock Navier–Stokes Solver **A96-118**
Lower–Upper Symmetric Gauss–Seidel Scheme Exhibiting Asymmetric Vortices over Slender Bodies **A96-119**
Computation of the Roll Characteristics of a Finned Projectile **A96-124**

Hydrodynamics

Gravitational Effects on Closed-Cellular-Foam Microstructure **A96-039**
Navier–Stokes Calculations for Rotating Configurations: Implementation for Rockets **A96-122**

Hypersonic Flow

Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics **A96-025**
Flap Efficiency and Heating of a Winged Re-Entry Vehicle **A96-026**
Model for Predicting Hypersonic Laminar Near-Wake Flowfields **A96-045**
Numerical Investigation of Laminar-Turbulent Transition on Re-Entry Capsules **A96-049**

Computational Fluid Dynamics Validation Using Multiple Interferometric Views of a Hypersonic Flowfield A96-050
Hypersonic Nozzle–Afterbody Experiment: Flow Visualization and Boundary-Layer Measurements A96-051
Hypersonic Nozzle–Afterbody Experiment: Flowfield Surveys A96-052
Experimental Investigation of Side-Jet Steering for Supersonic and Hypersonic Missiles A96-054
Experimental and Numerical Study of Hypersonic Forward-Facing Cavity Flow A96-055
Compressibility and Pressure-Gradient Correction Assessment for Turbulent Hypersonic Flows A96-069
Dual-Code Solution Strategy for Hypersonic Flows A96-070
Reevaluation of Flight-Derived Surface Recombination-Rate Expressions for Oxygen and Nitrogen A96-071
Recent Aerothermodynamic Flight Measurements During Shuttle Orbiter Re-Entry A96-073
Hypersonic Aerodynamic Characteristics of a Proposed Single-Stage-to-Orbit Vehicle A96-074
Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions A96-098
Comparison of Catalytic Wall Conditions for Hypersonic Flow A96-099
Aerodynamic Analysis of Commercial Experiment Transporter Re-Entry Capsule A96-102
Method for Calculating Force Coefficients of Bodies of Revolution A96-106
Hypersonic Nonequilibrium Parallel Multiblock Navier–Stokes Solver A96-118
Liquid Crystal Thermography for Heat Transfer Measurement in Hypersonic Flows: A Review A96-123

Inlet, Nozzle, Diffuser, and Channel Flows

Grid-Resolved Analysis of Base Flowfield for Four-Engine Clustered Nozzle Configuration A96-003
Hypersonic Nozzle–Afterbody Experiment: Flow Visualization and Boundary-Layer Measurements A96-051
Hypersonic Nozzle–Afterbody Experiment: Flowfield Surveys A96-052
Compressibility and Pressure-Gradient Correction Assessment for Turbulent Hypersonic Flows A96-069
Numerical Study of Low-Thrust Nozzles for Satellites A96-110

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Base-Bleed Experiments with a Cylindrical Afterbody in Supersonic Flow A96-004
Cone-Derived Waverider Flowfield Simulation Including Turbulence and Off-Design Conditions A96-027
Model for Predicting Hypersonic Laminar Near-Wake Flowfields A96-045
Hypersonic Nozzle–Afterbody Experiment: Flow Visualization and Boundary-Layer Measurements A96-051
Hypersonic Nozzle–Afterbody Experiment: Flowfield Surveys A96-052
Experimental Verification of Interference-Free Testing Concept for Vehicles with Propulsive Jets A96-053
Experimental Investigation of Side-Jet Steering for Supersonic and Hypersonic Missiles A96-054
Supersonic Base-Flow Computation Using Higher-Order Closure Turbulence Models A96-058
Experimental and Computational Wake Structure Study for a Wide-Angle Cone A96-076
Performance Aspects of Plug Cluster Nozzles A96-081
High-Enthalpy and Perfect-Gas Heating Measurements on a Blunt Cone A96-100
Computational Study of Supersonic Lateral Jet Flow Interactions A96-104
Liquid Crystal Thermography for Heat Transfer Measurement in Hypersonic Flows: A Review A96-123

Multiphase Flows

Gravitational Effects on Closed-Cellular-Foam Microstructure A96-039

Plasmadynamics and MHD

Low-Frequency Waves in the Plasma Environment Around the Shuttle A96-037
Three-Dimensional Modeling of Dual Ion-Thruster Plumes for Spacecraft Contamination A96-083

Rarefied Flows

Parametric and Classical Resonance in Passive Satellite Aerostabilization A96-033
Experimental and Computational Wake Structure Study for a Wide-Angle Cone A96-076
Heat Transfer in Two-Phase Solid-Rocket Plumes A96-079
Method for Calculating Force Coefficients of Bodies of Revolution A96-106

Reacting Flows and Combustion

Reevaluation of Flight-Derived Surface Recombination-Rate Expressions for Oxygen and Nitrogen A96-071

Separated Flows

Base-Bleed Experiments with a Cylindrical Afterbody in Supersonic Flow A96-004
Model for Predicting Hypersonic Laminar Near-Wake Flowfields A96-045
Experimental Verification of Interference-Free Testing Concept for Vehicles with Propulsive Jets A96-053
Supersonic Base-Flow Computation Using Higher-Order Closure Turbulence Models A96-058

Shock Waves and Detonations

Interaction of Solid-Rocket Exhaust with the Atmosphere A96-108

Subsonic Flow

Grid Fin Aerodynamics for Missile Applications in Subsonic Flow A96-005

Supersonic Flow

Spike-Nosed Projectiles with Vortex Rings: Steady and Nonsteady Flow Simulations A96-001
Base-Bleed Experiments with a Cylindrical Afterbody in Supersonic Flow A96-004
Cone-Derived Waverider Flowfield Simulation Including Turbulence and Off-Design Conditions A96-027
Experimental Verification of Interference-Free Testing Concept for Vehicles with Propulsive Jets A96-053
Launch-Vehicle Simulations Using a Concurrent, Implicit Navier–Stokes Solver A96-096

Fluid Dynamics

Unsteady Flows

Spike-Nosed Projectiles with Vortex Rings: Steady and Nonsteady Flow Simulations A96-001
Microgravity Experiment Acceleration Tolerability on Space Orbiting Laboratories A96-112

Viscous Non-Boundary-Layer Flows

Aerothermal Study of Mars Pathfinder Aeroshell A96-009

Vortices

Response of a Tactical Missile to Convected Aerodynamic Excitation A96-056
Experimental and Computational Wake Structure Study for a Wide-Angle Cone A96-076
Lower–Upper Symmetric Gauss–Seidel Scheme Exhibiting Asymmetric Vortices over Slender Bodies A96-119

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Damping Augmentation for Three-Cable Suspension System for Structural Testing A96-043

Astrodynamics

Space-Debris Identification Using Optical Calibration of Common Spacecraft Materials A96-038
Mass–Diameter and Characteristic-Length Ratio Functions for Orbital Debris A96-067
Mars Pathfinder Atmospheric Entry: Trajectory Design and Dispersion Analysis A96-107
Solar Force Modeling of Block IIR Global Positioning System Satellites A96-139

Computer Science

Visual Utility for the Localization of Corona-Accelerated Nuclei A96-114

Control System Design

Moving-Mass Roll Control System for Fixed-Trim Re-Entry Vehicle A96-008
Microgravity Isolation System Design: A Modern Control Synthesis Framework A96-015
Microgravity Isolation System Design: A Modern Control Analysis Framework A96-016
Microgravity Isolation System Design: A Case Study A96-017

Dynamics

Virtual Aerodynamical Coefficients of a Rotating Satellite A96-093

Flight Mechanics

Moving-Mass Roll Control System for Fixed-Trim Re-Entry Vehicle A96-008
Phugoid Motion for Grazing-Entry Trajectories at Near-Circular Speeds A96-030
Improved Missile Control Effectiveness Payoffs A96-103

Launch Vehicle Dynamics

Orbital Re-Entry Experiment Vehicle Ground and Flight Dynamic Test Results Comparison A96-101
Formulation and Analysis of Launch Vehicle Maneuvering Loads A96-131

Launch Vehicle Guidance and Control

Formulation and Analysis of Launch Vehicle Maneuvering Loads A96-131

Missile Dynamics

In-Flight Flexure and Spin Lock-In for Antitank Kinetic Energy Projectiles **A96-105**

Missile Guidance and Control

Moving-Mass Roll Control System for Fixed-Trim Re-Entry Vehicle **A96-008**
Midcourse Guidance for a Short-Range Attack Missile Using Error Compensation **A96-028**
Improved Missile Control Effectiveness Payoffs **A96-103**

Guidance, Control, and Dynamics Technology

Optimization Techniques

Decomposition Algorithm for Performance Optimization of a Launch Vehicle **A96-031**
Near-Optimal Low-Thrust Orbit Transfers Generated by a Genetic Algorithm **A96-138**

Spacecraft Dynamics

Phugoid Motion for Grazing-Entry Trajectories at Near-Circular Speeds **A96-030**
Parametric and Classical Resonance in Passive Satellite Aerostabilization **A96-033**
Multipayload Modeling for the Upper Atmosphere Research Satellite **A96-078**
Measured Spacecraft Instrument and Structural Interactions **A96-088**
Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 1: Formulation and Theory **A96-091**
Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 2: Orbital Environment Application **A96-092**
Nonlinear Dynamical Characteristics Analysis of Tethered Subsatellite in the Presence of Offset **A96-133**
Solar Force Modeling of Block IIR Global Positioning System Satellites **A96-139**

Spacecraft Guidance and Control

Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 1: Formulation and Theory **A96-091**
Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 2: Orbital Environment Application **A96-092**
Coning Instability of Spacecraft During Periods of Thrust **A96-126**
Solar Force Modeling of Block IIR Global Positioning System Satellites **A96-139**

Structural Control

Satellite Active and Passive Vibration Control During Liftoff **A96-066**

Trajectory Optimization

Midcourse Guidance for a Short-Range Attack Missile Using Error Compensation **A96-028**
Near-Optimal Low-Thrust Orbit Transfers Generated by a Genetic Algorithm **A96-138**

Interdisciplinary Topics

Aerospace Management

Effects on Operations of Highly Adaptive Missions **A96-044**

Aerospace Technology Utilization

Versatile Fluid-Mixing Device for Cell and Tissue Microgravity Research Applications **A96-018**

Analytical and Numerical Methods

Formulation and Analysis of Launch Vehicle Maneuvering Loads **A96-131**

Atmospheric and Space Sciences

Spacecraft Interaction with Atmospheric Species in Low Earth Orbit **A96-019**
Local Effects of Solid Rocket Motor Exhaust on Stratospheric Ozone **A96-021**
Trapped Electron Fluxes Measured by International Ultraviolet Explorer and AE-8 Model Predictions **A96-024**
Vehicle Glow Measurements on Space Transportation System Flight 62 **A96-035**
Low-Frequency Waves in the Plasma Environment Around the Shuttle **A96-037**
Optical Radiations from Interaction of Effluent Gases with the Low-Orbital Atmosphere **A96-061**
Payload Environment and Gas Release Effects on Sounding Rocket Neutral Pressure Measurements **A96-080**
Solid-Rocket-Motor Contribution to Large-Particle Orbital Debris Population **A96-082**
Interaction of Solid-Rocket Exhaust with the Atmosphere **A96-108**
Visual Utility for the Localization of Corona-Accelerated Nuclei **A96-114**
Martian Surface Wind Speeds Described by the Weibull Distribution **A96-121**
Tradeoffs Between Science Objectives and Ground System Capability **A96-143**

Research Facilities and Instrumentation

Versatile Fluid-Mixing Device for Cell and Tissue Microgravity Research Applications **A96-018**
Heat Capacity of Confined Helium Very Near the Lambda Point **A96-022**
Predictions of Counterfire Impact Results Obtained at 12 Kilometers per Second **A96-125**

Sensor Systems

Thunderstorm III 4-Megahertz Burst-Mode Data Acquisition System **A96-013**

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Spike-Nosed Projectiles with Vortex Rings: Steady and Nonsteady Flow Simulations **A96-001**
Code Validation for High-Speed Flow Simulation Over Satellite Launch Vehicle **A96-002**
Grid-Resolved Analysis of Base Flowfield for Four-Engine Clustered Nozzle Configuration **A96-003**
Three-Dimensional Computational Analysis of Complex Launch Vehicle Configurations **A96-007**
Experimental Investigation of Side-Jet Steering for Supersonic and Hypersonic Missiles **A96-054**
Experimental and Numerical Study of Hypersonic Forward-Facing Cavity Flow **A96-055**
Aeroprediction Code for Angles of Attack Above 30 Degrees **A96-057**
Launch-Vehicle Simulations Using a Concurrent, Implicit Navier–Stokes Solver **A96-096**
In-Flight Flexure and Spin Lock-In for Antitank Kinetic Energy Projectiles **A96-105**
Lower–Upper Symmetric Gauss–Seidel Scheme Exhibiting Asymmetric Vortices over Slender Bodies **A96-119**
Computation of the Roll Characteristics of a Finned Projectile **A96-124**

Configuration Design

Aeroprediction Code for Angles of Attack Above 30 Degrees **A96-057**
Analysis of Concepts for Single Stage to Orbit **A96-094**

Launch Vehicle and Sounding Rocket Systems

Three-Dimensional Computational Analysis of Complex Launch Vehicle Configurations **A96-007**
Investigation of Space Launch Vehicle Catastrophic Failures **A96-029**
Russian RD-704 for Single-Stage Vehicles **A96-047**
Analysis of Concepts for Single Stage to Orbit **A96-094**

Missile Systems

Aeroprediction Code for Angles of Attack Above 30 Degrees **A96-057**

Mission Studies and Economics

Analysis of Concepts for Single Stage to Orbit **A96-094**

Propulsion and Propellant Systems

Russian RD-704 for Single-Stage Vehicles **A96-047**
Draining of Liquid from Tanks of Square or Rectangular Cross Sections **A96-048**
Computational Pollutant Environment Assessment from Propulsion-System Testing **A96-060**
Effect of Transpiration Cooling on Nozzle Heat Transfer **A96-072**
Device to Suppress Vortexing During Draining from Cylindrical Tanks **A96-095**
Dual Fuel Solar Thermal Stage: Ideal Analysis **A96-120**
Coning Instability of Spacecraft During Periods of Thrust **A96-126**
Roll Torques Produced by Fixed-Nozzle Solid Rocket Motors **A96-127**
Thrust Misalignments of Fixed-Nozzle Solid Rocket Motors **A96-128**

Simulation

Decomposition Algorithm for Performance Optimization of a Launch Vehicle **A96-031**

Testing, Flight and Ground

Predictions of Counterfire Impact Results Obtained at 12 Kilometers per Second **A96-125**
Roll Torques Produced by Fixed-Nozzle Solid Rocket Motors **A96-127**
Thrust Misalignments of Fixed-Nozzle Solid Rocket Motors **A96-128**

Vibration

Transonic Drag Effect on Vibration Characteristics of Single-Stage Space Vehicles **A96-046**
Response of a Tactical Missile to Convected Aerodynamic Excitation **A96-056**

Propulsion

Combustion and Combustor Designs

Effect of Transpiration Cooling on Nozzle Heat Transfer **A96-072**

Electric and Advanced Space Propulsion

Arcjet Development for Amateur Radio Satellite **A96-012**

System Optimization of Ablative Pulsed Plasma Thrusters for Stationkeeping A96-014
Frequency-Domain Electromagnetic Characteristics of a 26-Kilowatt Ammonia Arcjet A96-020
Three-Dimensional Modeling of Dual Ion-Thruster Plumes for Spacecraft Contamination A96-083
Evaluation of the United Kingdom Ion Thruster A96-117

Engine Performance

Performance Aspects of Plug Cluster Nozzles A96-081

Environmental Effects

Computational Pollutant Environment Assessment from Propulsion-System Testing A96-060
Payload Environment and Gas Release Effects on Sounding Rocket Neutral Pressure Measurements A96-080
Solid-Rocket-Motor Contribution to Large-Particle Orbital Debris Population A96-082

Liquid Rocket Motors and Missile Systems

Investigation of Space Launch Vehicle Catastrophic Failures A96-029
Performance Aspects of Plug Cluster Nozzles A96-081
Device to Suppress Vortexing During Draining from Cylindrical Tanks A96-095

Solid Rocket Motors and Missile Systems

Local Effects of Solid Rocket Motor Exhaust on Stratospheric Ozone A96-021
Investigation of Space Launch Vehicle Catastrophic Failures A96-029
Coning Instability of Spacecraft During Periods of Thrust A96-126

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Mars Sample Return: A Direct and Minimum-Risk Design A96-059
High-Enthalpy and Perfect-Gas Heating Measurements on a Blunt Cone A96-100
Orbital Re-Entry Experiment Vehicle Ground and Flight Dynamic Test Results Comparison A96-101

Aerobraking Flight Mechanics

Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics A96-025
Virtual Aerodynamical Coefficients of a Rotating Satellite A96-093
Orbital Re-Entry Experiment Vehicle Ground and Flight Dynamic Test Results Comparison A96-101
Aerodynamic Analysis of Commercial Experiment Transporter Re-Entry Capsule A96-102

Mission Design and Analysis

Electric-Propulsion Spacecraft Optimization for Lunar Missions A96-034
Bent-Biconic Single-Stage-to-Orbit Vehicle Conceptual Study A96-075
Mars Pathfinder Atmospheric Entry: Trajectory Design and Dispersion Analysis A96-107
Space Station Based Tethered Interferometer for Natural Disaster Monitoring A96-111
Experimental Assessment of the Influence of Heat Pipes on a Nutating Satellite A96-113
Small Solar Probe A96-115
Tradeoffs Between Science Objectives and Ground System Capability A96-143

Mission Trajectories (Earth and Interplanetary)

Decomposition Algorithm for Performance Optimization of a Launch Vehicle A96-031
Electric-Propulsion Spacecraft Optimization for Lunar Missions A96-034
Virtual Aerodynamical Coefficients of a Rotating Satellite A96-093
Mars Pathfinder Atmospheric Entry: Trajectory Design and Dispersion Analysis A96-107

Space Experiments

Analysis of the Solwind Fragmentation Event Using Theory and Computations A96-011
Thunderstorm III 4-Megahertz Burst-Mode Data Acquisition System A96-013
Microgravity Isolation System Design: A Modern Control Synthesis Framework A96-015
Microgravity Isolation System Design: A Modern Control Analysis Framework A96-016
Versatile Fluid-Mixing Device for Cell and Tissue Microgravity Research Applications A96-018
Spacecraft Interaction with Atmospheric Species in Low Earth Orbit A96-019
Heat Capacity of Confined Helium Very Near the Lambda Point A96-022
United States and Russian Thermal Control Coating Results in Low Earth Orbit A96-023
Parametric and Classical Resonance in Passive Satellite Aerostabilization A96-033
Vehicle Glow Measurements on Space Transportation System Flight 62 A96-035
Experimental Validation of Particle Model Drift Theories A96-036
Low-Frequency Waves in the Plasma Environment Around the Shuttle A96-037
Space-Debris Identification Using Optical Calibration of Common Spacecraft Materials A96-038
Effects on Operations of Highly Adaptive Missions A96-044
Optical Radiations from Interaction of Effluent Gases with the Low-Orbital Atmosphere A96-061
Data Analysis and Model Comparison for Solar Array Module Plasma Interactions Experiment A96-068
Payload Environment and Gas Release Effects on Sounding Rocket Neutral Pressure Measurements A96-080
Space Station Based Tethered Interferometer for Natural Disaster Monitoring A96-111
Microgravity Experiment Acceleration Tolerability on Space Orbiting Laboratories A96-112
Spacecraft Charging Anomaly on a Low-Altitude Satellite in an Aurora A96-116
Radiation-Induced Anomalies in Satellites A96-142

Space Systems

System Optimization of Ablative Pulsed Plasma Thrusters for Stationkeeping A96-014
Effects on Operations of Highly Adaptive Missions A96-044
Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 1: Formulation and Theory A96-091
Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 2: Orbital Environment Application A96-092
Space Station Based Tethered Interferometer for Natural Disaster Monitoring A96-111
Microgravity Experiment Acceleration Tolerability on Space Orbiting Laboratories A96-112
Experimental Assessment of the Influence of Heat Pipes on a Nutating Satellite A96-113
Visual Utility for the Localization of Corona-Accelerated Nuclei A96-114
Spacecraft Charging Anomaly on a Low-Altitude Satellite in an Aurora A96-116
Dual Fuel Solar Thermal Stage: Ideal Analysis A96-120
Space-Based Electrostatic Antenna Design with Pointing and Beam Width Control A96-135
Reliability Analysis of Transmission Requirements in Communication Satellite Systems A96-137
Radiation-Induced Anomalies in Satellites A96-142

Spacecraft Attitude Determination

Measured Spacecraft Instrument and Structural Interactions A96-088
Experimental Assessment of the Influence of Heat Pipes on a Nutating Satellite A96-113

Spacecraft Communication

Systems Design of a Satellite Link Protocol A96-006
Deployment of Dishes with Surface Discontinuities A96-090
Space-Based Electrostatic Antenna Design with Pointing and Beam Width Control A96-135

Spacecraft Contamination/Sterilization

Optical Radiations from Interaction of Effluent Gases with the Low-Orbital Atmosphere A96-061
Three-Dimensional Modeling of Dual Ion-Thruster Plumes for Spacecraft Contamination A96-083
Interaction of Solid-Rocket Exhaust with the Atmosphere A96-108

Spacecraft Data Sensing, Processing, and Transmission

Thunderstorm III 4-Megahertz Burst-Mode Data Acquisition System A96-013
Measured Spacecraft Instrument and Structural Interactions A96-088

Spacecraft Power

Data Analysis and Model Comparison for Solar Array Module Plasma Interactions Experiment A96-068
Alignment and Initial Operation of an Advanced Solar Simulator A96-140

Spacecraft Propulsion System Integration

Arcjet Development for Amateur Radio Satellite A96-012
Frequency-Domain Electromagnetic Characteristics of a 26-Kilowatt Ammonia Arcjet A96-020
Evaluation of the United Kingdom Ion Thruster A96-117
Roll Torques Produced by Fixed-Nozzle Solid Rocket Motors A96-127
Thrust Misalignments of Fixed-Nozzle Solid Rocket Motors A96-128

Spacecraft Radiation Protection

Trapped Electron Fluxes Measured by International Ultraviolet Explorer and AE-8 Model Predictions A96-024
Experimental Validation of Particle Model Drift Theories A96-036

Radiation-Induced Anomalies in Satellites A96-142

Spacecraft Sensor Systems

Experimental Validation of Particle Model Drift Theories A96-036
Spacecraft Charging Anomaly on a Low-Altitude Satellite in an Aurora A96-116

Spacecraft Structural Configuration, Design, and Analysis

Three-Dimensional Computational Analysis of Complex Launch Vehicle Configurations A96-007
Dynamic Continuum Modeling of Truss-Type Space Structures Using Spectral Elements A96-062
Two-Dimensional Deployable Hexapod Truss A96-064
Combining Genetic and Deterministic Algorithms for Locating Actuators on Space Structures A96-065
Multipayload Modeling for the Upper Atmosphere Research Satellite A96-078
Deployment of Dishes with Surface Discontinuities A96-090
Reliability Analysis of Transmission Requirements in Communication Satellite Systems A96-137

Spacecraft Test and Evaluation

In-Orbit Deployment Performance of Large Satellite Antennas A96-032
Ground Modal Tests of Space-Structure Components Using Boundary Masses A96-040
Space-Station Breadboard Beta Gimbal Assembly: Thermal-Vacuum Testing and Analyses A96-109
Evaluation of the United Kingdom Ion Thruster A96-117
Analysis of Nonlinear Mechanisms in a Precision Deployable Structure Using Measured Flexibility A96-136
Five-Electron-Volt Atomic Oxygen Pulsed-Beam Characterization by Quadrupolar Mass Spectrometry A96-141

Spacecraft Thermal Management

United States and Russian Thermal Control Coating Results in Low Earth Orbit A96-023
Microencapsulated Phase-Change Material Suspensions for Heat Transfer in Spacecraft Thermal Systems A96-041
Development and Verification of a Cryogenic Brilliant Eyes Thermal Storage Unit A96-089
Small Solar Probe A96-115
Weight Optimization for Honeycomb Radiators with Embedded Heat Pipes A96-132

Structural Mechanics and Materials

Aeroelasticity and Control

In-Flight Flexure and Spin Lock-In for Antitank Kinetic Energy Projectiles A96-105

Dynamic Model Analysis

Ground Modal Tests of Space-Structure Components Using Boundary Masses A96-040
Multipayload Modeling for the Upper Atmosphere Research Satellite A96-078

Flexible and Active Structures

Combining Genetic and Deterministic Algorithms for Locating Actuators on Space Structures A96-065
Analysis of Nonlinear Mechanisms in a Precision Deployable Structure Using Measured Flexibility A96-136

Materials Structural Properties

Gravitational Effects on Closed-Cellular-Foam Microstructure A96-039

Structural Design

In-Orbit Deployment Performance of Large Satellite Antennas A96-032
Multicriterion Preliminary Design of a Tetrahedral Truss Platform A96-063
Two-Dimensional Deployable Hexapod Truss A96-064
Large-Angle Articulated Beam Truss Design Methodology Considering Offset Joint Modeling A96-086
Deployment of Dishes with Surface Discontinuities A96-090

Structural Dynamics and Characterization

In-Orbit Deployment Performance of Large Satellite Antennas A96-032
Ground Modal Tests of Space-Structure Components Using Boundary Masses A96-040
Transonic Drag Effect on Vibration Characteristics of Single-Stage Space Vehicles A96-046
Response of a Tactical Missile to Convected Aerodynamic Excitation A96-056
Dynamic Continuum Modeling of Truss-Type Space Structures Using Spectral Elements A96-062

Structural Modeling

Transonic Drag Effect on Vibration Characteristics of Single-Stage Space Vehicles A96-046
Dynamic Continuum Modeling of Truss-Type Space Structures Using Spectral Elements A96-062
Large-Angle Articulated Beam Truss Design Methodology Considering Offset Joint Modeling A96-086
Analysis of Nonlinear Mechanisms in a Precision Deployable Structure Using Measured Flexibility A96-136

Structural Optimization

Multicriterion Preliminary Design of a Tetrahedral Truss Platform A96-063
Combining Genetic and Deterministic Algorithms for Locating Actuators on Space Structures A96-065

Structural Stability

Vibration of Geometrically Imperfect Panels Subjected to Thermal and Mechanical Loads A96-042

Thermal Effects

Vibration of Geometrically Imperfect Panels Subjected to Thermal and Mechanical Loads A96-042

Thermophysics and Heat Transfer

Aerothermodynamics/Thermal Protection

Aerothermal Study of Mars Pathfinder Aeroshell A96-009
Mars Sample Return: A Direct and Minimum-Risk Design A96-059
Dual-Code Solution Strategy for Hypersonic Flows A96-070
Reevaluation of Flight-Derived Surface Recombination-Rate Expressions for Oxygen and Nitrogen A96-071
Recent Aerothermodynamic Flight Measurements During Shuttle Orbiter Re-Entry A96-073
High-Enthalpy and Perfect-Gas Heating Measurements on a Blunt Cone A96-100
Liquid Crystal Thermography for Heat Transfer Measurement in Hypersonic Flows: A Review A96-123
Navier–Stokes Heating Calculations for Benchmark Thermal Protection System Sizing A96-130

Computational Heat Transfer

Heat Transfer in Two-Phase Solid-Rocket Plumes A96-079

Cryogenics

Heat Capacity of Confined Helium Very Near the Lambda Point A96-022
Development and Verification of a Cryogenic Brilliant Eyes Thermal Storage Unit A96-089

Electronics Cooling

Microencapsulated Phase-Change Material Suspensions for Heat Transfer in Spacecraft Thermal Systems A96-041

Forced Convection

Effect of Transpiration Cooling on Nozzle Heat Transfer A96-072
Recent Aerothermodynamic Flight Measurements During Shuttle Orbiter Re-Entry A96-073
Heat Transfer in Two-Phase Solid-Rocket Plumes A96-079

Melting/Solidification

Microencapsulated Phase-Change Material Suspensions for Heat Transfer in Spacecraft Thermal Systems A96-041
Development and Verification of a Cryogenic Brilliant Eyes Thermal Storage Unit A96-089

Radiation Interchange Between Surfaces

Space-Station Breadboard Beta Gimbal Assembly: Thermal-Vacuum Testing and Analyses A96-109

Thermal Control

Weight Optimization for Honeycomb Radiators with Embedded Heat Pipes A96-132

Thermal Modeling and Analysis

Space-Station Breadboard Beta Gimbal Assembly: Thermal-Vacuum Testing and Analyses A96-109
Navier–Stokes Heating Calculations for Benchmark Thermal Protection System Sizing A96-130
Weight Optimization for Honeycomb Radiators with Embedded Heat Pipes A96-132

Thermochemistry and Chemical Kinetics

Aerothermal Study of Mars Pathfinder Aeroshell A96-009

Chronological Index

A96-001 Spike-Nosed Projectiles with Vortex Rings: Steady and Nonsteady Flow Simulations. Ameer G. Mikhail, *U.S. Army Research Laboratory* (**33**, 1, p. 8) Article

A96-002 Code Validation for High-Speed Flow Simulation Over Satellite Launch Vehicle. J. L. F. Azevedo and P. Moraes Jr., *Instituto de Aeronáutica e Espaco, Brazil*; and C. R. Maliska, C. H. Marchi, and A. F. C. Silva, *Universidade Federal de Santa Catarina, Brazil* (**33**, 1, p. 15) Article based on AIAA Paper 93-3046

A96-003 Grid-Resolved Analysis of Base Flowfield for Four-Engine Clustered Nozzle Configuration. Ten-See Wang, *NASA Marshall Space Flight Center* (**33**, 1, p. 22) Article

A96-004 Base-Bleed Experiments with a Cylindrical Afterbody in Supersonic Flow. Tarun Mathur and J. Craig Dutton, *University of Illinois at Urbana–Champaign* (**33**, 1, p. 30) Article

A96-005 Grid Fin Aerodynamics for Missile Applications in Subsonic Flow. John E. Burkhalter and Harris M. Frank, *Auburn University* (**33**, 1, p. 38) Article

A96-006 Systems Design of a Satellite Link Protocol. John Murphy, Edward Chow, and Richard Markley, *Jet Propulsion Laboratory, California Institute of Technology* (**33**, 1, p. 45) Article

A96-007 Three-Dimensional Computational Analysis of Complex Launch Vehicle Configurations. Grant Palmer and Pieter Buning, *NASA Ames Research Center*; Herb Yanowitz, *EER Systems Corporation*; and Ethiraj Venkatapathy, *Thermosciences Institute* (**33**, 1, p. 49) Article based on AIAA Paper 94-1863 CP946

A96-008 Moving-Mass Roll Control System for Fixed-Trim Re-Entry Vehicle. Thomas Petsopoulos and Frank J. Regan, *U.S. Naval Surface Warfare Center*; and Jewel Barlow, *University of Maryland* (**33**, 1, p. 54) Article

A96-009 Aerothermal Study of Mars Pathfinder Aeroshell. Roop N. Gupta, *NASA Langley Research Center*; K. P. Lee, *ViGYAN, Inc.*; and Carl D. Scott, *NASA Johnson Space Center* (**33**, 1, p. 61) Article

A96-010 Atmospheric Research with the Small Expendable Deployer System: Preliminary Analysis. Michele Grassi, *University of Naples "Federico II," Italy*; and Mario L. Cosmo, *Smithsonian Astrophysical Observatory* (**33**, 1, p. 70) Article

A96-011 Analysis of the Solwind Fragmentation Event Using Theory and Computations. Arjun Tan, *Alabama A&M University*; Gautam D. Badhwar, *NASA Johnson Space Center*; and Firooz A. Allahdadi and David F. Medina, *U.S. Air Force Phillips Laboratory* (**33**, 1, p. 79) Article

A96-012 Arcjet Development for Amateur Radio Satellite. Ernst W. Messerschmid, *University of Stuttgart, Germany*; Dieter M. Zube, *Technical University of Dresden, Germany*; Karl Meinzer, *AMSAT Deutschland e.V., Germany*; and Helmut L. Kurtz, *University of Stuttgart, Germany* (**33**, 1, p. 86) Article

A96-013 Thunderstorm III 4-Megahertz Burst-Mode Data Acquisition System. Steven D. Baker, Michael C. Kelley, and Timothy F. Wheeler, *Cornell University* (**33**, 1, p. 92) Article

A96-014 System Optimization of Ablative Pulsed Plasma Thrusters for Stationkeeping. Edgar Y. Choueiri, *Princeton University* (**33**, 1, p. 96) Article

A96-015 Microgravity Isolation System Design: A Modern Control Synthesis Framework. R. David Hampton, *McNeese State University*; Carl R. Knospe, *University of Virginia*; and Carlos M. Grodsinsky, *NASA Lewis Research Center* (**33**, 1, p. 101) Article

A96-016 Microgravity Isolation System Design: A Modern Control Analysis Framework. R. David Hampton, *McNeese State University*; Carl R. Knospe, *University of Virginia*; and Carlos M. Grodsinsky, *NASA Lewis Research Center* (**33**, 1, p. 110) Article

A96-017 Microgravity Isolation System Design: A Case Study. R. David Hampton, *McNeese State University*; Carl R. Knospe, *University of Virginia*; and Carlos M. Grodsinsky, *NASA Lewis Research Center* (**33**, 1, p. 120) Article

A96-018 Versatile Fluid-Mixing Device for Cell and Tissue Microgravity Research Applications. William W. Wilfinger, Carol S. Baker, Elaine L. Kunze, Allen T. Phillips, and Roy H. Hammerstedt, *Pennsylvania State University* (**33**, 1, p. 126) Article

A96-019 Spacecraft Interaction with Atmospheric Species in Low Earth Orbit. Edmond Murad, *U.S. Air Force Phillips Laboratory* (**33**, 1, p. 131) Article

A96-020 Frequency-Domain Electromagnetic Characteristics of a 26-Kilowatt Ammonia Arcjet. L. K. Johnson, A. Rivera, and M. Lundquist, *The Aerospace Corporation*; T. M. Sanks and A. Sutton, *U.S. Air Force Phillips Laboratory*; and D. R. Bromaghim, *SPARTA, Inc.* (**33**, 1, p. 137) Article

A96-021 Local Effects of Solid Rocket Motor Exhaust on Stratospheric Ozone. Martin Ross, *The Aerospace Corporation* (**33**, 1, p. 144) Article

A96-022 Heat Capacity of Confined Helium Very Near the Lambda Point. D. R. Swanson, J. A. Nissen, X. Qin, P. R. Williamson, and J. A. Lipa, *Stanford University*; T. C. P. Chui and U. E. Israelsson, *Jet Propulsion Laboratory, California Institute of Technology*; and F. M. Gasparini, *State University of New York at Buffalo* (**33**, 1, p. 154) Article

A96-023 United States and Russian Thermal Control Coating Results in Low Earth Orbit. A. C. Tribble, R. Lukins, and E. Watts, *Rockwell International*; and V. A. Borisov, S. A. Demidov, V. A. Denisenko, A. A. Gorodetskiy, V. K. Grishin, S. F. Nauma, V. K. Sergeev, and S. P. Sokolova, *S.P. Korolev Space Corporation Energia, Russia* (**33**, 1, p. 160) Article

A96-024 Trapped-Electron Fluxes Measured by International Ultraviolet Explorer and AE-8 Model Predictions. Richard Arquilla, *Computer Sciences Corporation* (**33**, 1, p. 167) Engineering Note

A96-025 Influence of Sonic-Line Location on Mars Pathfinder Probe Aerothermodynamics. Peter A. Gnoffo, K. James Weilmuenster, Robert D. Braun, and Christopher I. Cruz, *NASA Langley Research Center* (**33**, 2, p. 169) Article

A96-026 Flap Efficiency and Heating of a Winged Re-Entry Vehicle. J. M. A. Longo and R. Radespiel, *DLR, German Aerospace Research Establishment* (**33**, 2, p. 178) Article

A96-027 Cone-Derived Waverider Flowfield Simulation Including Turbulence and Off-Design Conditions. Yijian Shi, Bor-Jang Tsai, and John B. Miles, *University of Missouri–Columbia*; and Kakkattukuzhy M. Isaac, *University of Missouri–Rolla* (**33**, 2, p. 185) Article

A96-028 Midcourse Guidance for a Short-Range Attack Missile Using Error Compensation. Dinesh V. Muzumdar and David G. Hull, *University of Texas at Austin* (**33**, 2, p. 191) Article

A96-029 Investigation of Space Launch Vehicle Catastrophic Failures. I-Shih Chang, *The Aerospace Corporation* (**33**, 2, p. 198) Article

A96-030 Phugoid Motion for Grazing-Entry Trajectories at Near-Circular Speeds. Nguyen X. Vinh, Vincent T. Coppola, and L. de-Olivé Ferreira, *University of Michigan* (**33**, 2, p. 206) Article

A96-031 Decomposition Algorithm for Performance Optimization of a Launch Vehicle. M. Rahn and U. M. Schöttle, *Stuttgart University, Germany* (**33**, 2, p. 214) Article

A96-032 In-Orbit Deployment Performance of Large Satellite Antennas. Akira Meguro, *Nippon Telegraph and Telephone Corporation, Japan* (**33**, 2, p. 222) Article

A96-033 Parametric and Classical Resonance in Passive Satellite Aerostabilization. Renjith R. Kumar, Daniel D. Mazanek, and Michael L. Heck, *Analytical Mechanics Associates, Inc.* (**33**, 2, p. 228) Article

A96-034 Electric-Propulsion Spacecraft Optimization for Lunar Missions. Craig A. Kluever and Kun-Rong Chang, *University of Missouri–Columbia/Kansas City* (**33**, 2, p. 235) Article

A96-035 Vehicle Glow Measurements on Space Transportation System Flight 62. G. R. Swenson and R. L. Rairden, *Lockheed Martin Corporation*; D. E. Jennings, *NASA Goddard Space Flight Center*; and M. Ahmadjian, *U.S. Air Force Phillips Laboratory* (**33**, 2, p. 240) Article

A96-036 Experimental Validation of Particle Model Drift Theories. M. Lauriente, *NASA Goddard Space Flight Center*; A. L. Vampola and P. Inamti, *University Research Foundation*; and D. Bilitza, *Hughes STX* (**33**, 2, p. 250) Article

A96-037 Low-Frequency Waves in the Plasma Environment Around the Shuttle. Boris V. Vayner and Dale C. Ferguson, *NASA Lewis Research Center* (**33**, 2, p. 255) Article

A96-038 Space-Debris Identification Using Optical Calibration of Common Spacecraft Materials. Robert D. Culp and Ian J. Gravseth, *University of Colorado* (**33**, 2, p. 262) Article

A96-039 Gravitational Effects on Closed-Cellular-Foam Microstructure. David A. Noever and Raymond J. Cronise, *NASA Marshall Space Flight Center*; and Francis C. Wessling, Samuel P. McMannus, John Mathews, and Darayas Patel, *University of Alabama in Huntsville* (**33**, 2, p. 267) Article

A96-040 Ground Modal Tests of Space-Structure Components Using Boundary Masses. Mordechay Karpel and Daniella Raveh, *Technion—Israel Institute of Technology*; and Sergio Ricci, *Politecnico di Milano, Italy* (**33**, 2, p. 272) Article

A96-041 Microencapsulated Phase-Change Material Suspensions for Heat Transfer in Spacecraft Thermal Systems. J. C. Mulligan, *North Carolina State University*; and D. P. Colvin and Y. G. Bryant, *Triangle Research and Development Corporation* (**33**, 2, p. 278) Article based on AIAA Paper 94-2004

A96-042 Vibration of Geometrically Imperfect Panels Subjected to Thermal and Mechanical Loads. L. Librescu and W. Lin, *Virginia Polytechnic Institute and State University*; and M. P. Nemeth and J. H. Starnes Jr., *NASA Langley Research Center* (**33**, 2, p. 285) Article

A96-043 Damping Augmentation for Three-Cable Suspension System for Structural Testing. Li-Farn Yang, *National Chung Cheng University, Taiwan, ROC* (**33**, 2, p. 292) Article

A96-044 Effects on Operations of Highly Adaptive Missions. Mark J. Rokey and Stephen D. Wall, *Jet Propulsion Laboratory, California Institute of Technology* (**33**, 2, p. 298) Article

A96-045 Model for Predicting Hypersonic Laminar Near-Wake Flowfields. Kenneth K. Muramoto, *Lockheed Missiles and Space Company, Inc.* (**33**, 2, p. 305) Engineering Note

A96-046 Transonic Drag Effect on Vibration Characteristics of Single-Stage Space Vehicles. Ashok Joshi, *Indian Institute of Technology* (**33**, 2, p. 308) Engineering Note

A96-047 Russian RD-704 for Single-Stage Vehicles. James A. Martin, Thongsay Vongpaseuth, and G. Venkatasubramanyam, *University of Alabama* (**33**, 2, p. 309) Engineering Note based on AIAA Paper 95-2952

A96-048 Draining of Liquid from Tanks of Square or Rectangular Cross Sections. B. H. Lakshmana Gowda, *Indian Institute of Technology* (**33**, 2, p. 311) Engineering Note

A96-049 Numerical Investigation of Laminar-Turbulent Transition on Re-Entry Capsules. E. Laurien, *Technical University of Braunschweig, Germany* (**33**, 3, p. 313) Article based on AIAA Paper 95-0775

A96-050 Computational Fluid Dynamics Validation Using Multiple Interferometric Views of a Hypersonic Flowfield. R. R. Boyce, J. W. Morton, and A. F. P. Houwing, *Australian National University*; C. Mundt, *Deutsche Aerospace, Germany*; and D. J. Bone, *Commonwealth Scientific and Industrial Research Organization, Australia* (**33**, 3, p. 319) Article

A96-051 Hypersonic Nozzle–Afterbody Experiment: Flow Visualization and Boundary-Layer Measurements. Earl R. Keener, *Eloret Institute*; and Frank W. Spaid, *McDonnell Douglas Corporation* (**33**, 3, p. 326) Article

A96-052 Hypersonic Nozzle–Afterbody Experiment: Flowfield Surveys. Frank W. Spaid, *McDonnell Douglas Corporation*; and Earl R. Keener, *Eloret Institute* (**33**, 3, p. 333) Article

A96-053 Experimental Verification of Interference-Free Testing Concept for Vehicles with Propulsive Jets. J. Olsson and J. Agrell, *Aeronautical Research Institute of Sweden*; and R. A. White and H. H. Korst, *University of Illinois at Urbana–Champaign* (**33**, 3, p. 339) Article based on AIAA Paper 94-2570

A96-054 Experimental Investigation of Side-Jet Steering for Supersonic and Hypersonic Missiles. Julius Brandeis and Jacob Gill, *RAFAEL, Ministry of Defense, Israel* (**33**, 3, p. 346) Article based on AIAA Paper 95-0316

A96-055 Experimental and Numerical Study of Hypersonic Forward-Facing Cavity Flow. W. A. Engblom, B. Yüceil, D. B. Goldstein, and D. S. Dolling, *University of Texas at Austin* (**33**, 3, p. 353) Article

A96-056 Response of a Tactical Missile to Convected Aerodynamic Excitation. Mark S. Ewing, *University of Kansas* (**33**, 3, p. 360) Article

A96-057 Aeroprediction Code for Angles of Attack Above 30 Degrees. F. G. Moore, R. M. McInville, and T. Hymer, *U.S. Naval Surface Warfare Center* (**33**, 3, p. 366) Article

A96-058 Supersonic Base-Flow Computation Using Higher-Order Closure Turbulence Models. C. C. Chuang, *Chung Shan Institute of Science and Technology, Taiwan, ROC*; and C. C. Chieng, *National Tsing Hua University, Taiwan, ROC* (**33**, 3, p. 374) Article

A96-059 Mars Sample Return: A Direct and Minimum-Risk Design. P. F. Wercinski, *NASA Ames Research Center* (**33**, 3, p. 381) Article

A96-060 Computational Pollutant Environment Assessment from Propulsion-System Testing. Ten-See Wang and Paul McConnaughey, *NASA Marshall Space Flight Center*; Yen-Sen Chen,

Engineering Sciences, Inc.; and Saif Warsi, *Sverdrup Technology, Inc.* (**33**, 3, p. 386) Article

A96-061 Optical Radiations from Interaction of Effluent Gases with the Low-Orbital Atmosphere. David L. A. Rall and Irving L. Kofsky, *PhotoMetrics, Inc.*; Charles P. Pike and David J. Knecht, *U.S. Air Force Phillips Laboratory*; and Theodore P. Zehnpfennig, *Visidyne, Inc.* (**33**, 3, p. 393) Article

A96-062 Dynamic Continuum Modeling of Truss-Type Space Structures Using Spectral Elements. Usik Lee and Joonkeun Lee, *Inha University, Korea* (**33**, 3, p. 404) Article

A96-063 Multicriterion Preliminary Design of a Tetrahedral Truss Platform. K. Chauncey Wu and Mark S. Lake, *NASA Langley Research Center* (**33**, 3, p. 410) Article

A96-064 Two-Dimensional Deployable Hexapod Truss. Junjiro Onoda, *Institute of Space and Astronautical Science, Japan*; Dan-Ying Fu, *Beijing Institute of Space Machine and Electricity, PRC*; and Kenji Minesugi, *Institute of Space and Astronautical Science, Japan* (**33**, 3, p. 416) Article

A96-065 Combining Genetic and Deterministic Algorithms for Locating Actuators on Space Structures. Hiroshi Furuya, *Tokyo Institute of Technology, Japan*; and Raphael T. Haftka, *University of Florida* (**33**, 3, p. 422) Article based on AIAA Paper 95-1400 CP952

A96-066 Satellite Active and Passive Vibration Control During Liftoff. Gina J. Lee-Glauser, *NASA Langley Research Center*; and Goodarz Ahmadi and Jeffrey B. Layton, *Clarkson University* (**33**, 3, p. 428) Article based on AIAA Paper 95-1235 CP952

A96-067 Mass–Diameter and Characteristic-Length Ratio Functions for Orbital Debris. Ian J. Gravseth, *University of Colorado*; Timothy D. Maclay, *Kaman Sciences Corporation*; and Robert D. Culp, *University of Colorado* (**33**, 3, p. 433) Article

A96-068 Data Analysis and Model Comparison for Solar Array Module Plasma Interactions Experiment. Carmen Perez de la Cruz and Daniel E. Hastings, *Massachusetts Institute of Technology*; and Dale Ferguson and Barry Hillard, *NASA Lewis Research Center* (**33**, 3, p. 438) Article

A96-069 Compressibility and Pressure-Gradient Correction Assessment for Turbulent Hypersonic Flows. Jiasen Hu and Arthur Rizzi, *Royal Institute of Technology, Sweden* (**33**, 3, p. 447) Engineering Note based on AIAA Paper 95-2313

A96-070 Dual-Code Solution Strategy for Hypersonic Flows. William A. Wood and Richard A. Thompson, *NASA Langley Research Center*; and Scott Eberhardt, *University of Washington* (**33**, 3, p. 449) Engineering Note

A96-071 Reevaluation of Flight-Derived Surface Recombination-Rate Expressions for Oxygen and Nitrogen. R. N. Gupta, *NASA Langley Research Center* (**33**, 3, p. 451) Engineering Note

A96-072 Effect of Transpiration Cooling on Nozzle Heat Transfer. F. Chen, W. J. Bowman, and R. Bowersox, *U.S. Air Force Institute of Technology* (**33**, 3, p. 453) Engineering Note

A96-073 Recent Aerothermodynamic Flight Measurements During Shuttle Orbiter Re-Entry. John J. Bertin, *U.S. Air Force Academy*; Stanley A. Bouslog and Kuo-Chi Wang, *Lockheed Martin Engineering and Sciences*; and Charles H. Campbell, *NASA Johnson Space Center* (**33**, 4, p. 457) Article

A96-074 Hypersonic Aerodynamic Characteristics of a Proposed Single-Stage-to-Orbit Vehicle. K. James Weilmuenster, P. A. Gnoffo, F. A. Greene, C. J. Riley, and H. H. Hamilton II, *NASA Langley Research Center*; and S. J. Alter, *Lockheed Engineering Sciences Company* (**33**, 4, p. 463) Article

A96-075 Bent-Biconic Single-Stage-to-Orbit Vehicle Conceptual Study. Chul Park, Gene P. Menees, Jeffrey V. Bowles, and Scott L. Lawrence, *NASA Ames Research Center*; and Carol B. Davies, *Sterling Software* (**33**, 4, p. 470) Article

A96-076 Experimental and Computational Wake Structure Study for a Wide-Angle Cone. A. Danckert and H. Legge, *DLR, German Aerospace Research Establishment* (**33**, 4, p. 476) Article

A96-077 Numerical Study of Multidirectional-Curvature Waverider with Finlets. Sheam-Chyun Lin and Ming-Chiou Shen, *National Taiwan Institute of Technology, ROC* (**33**, 4, p. 483) Article

A96-078 Multipayload Modeling for the Upper Atmosphere Research Satellite. C. R. Larson, *Rockwell International*; S. E. Woodard, *NASA Langley Research Center*; and L. Tischner, E. Tong, M. Schmidt, J. Cheng, E. Fujii, and S. Ghofranian, *Rockwell International* (**33**, 4, p. 489) Article based on AIAA Paper 95-0622

A96-079 Heat Transfer in Two-Phase Solid-Rocket Plumes. H. F. Nelson and John C. Fields, *University of Missouri–Rolla* (**33**, 4, p. 494) Article based on AIAA Paper 95-2131

A96-080 Payload Environment and Gas Release Effects on Sounding Rocket Neutral Pressure Measurements. Jolene S. Pickett, David D. Morgan, and Robert L. Merlino, *University of Iowa*; Mark L. Adrian, *University of Alabama in Huntsville*; and Glenn A. Berg and W. John Raitt, *Utah State University* (**33**, 4, p. 501) Article

A96-081 Performance Aspects of Plug Cluster Nozzles. Michael Fick and Robert H. Schmucker, *Technical University of Munich, Germany* (**33**, 4, p. 507) Article based on AIAA Paper 95-2694

A96-082 Solid-Rocket-Motor Contribution to Large-Particle Orbital Debris Population. Gregory W. Ojakangas, *University of Minnesota at Duluth*; B. Jeffrey Anderson, *NASA Marshall Space Flight Center*; and Phillip D. Anz-Meador, *Viking Science and Technology, Inc.* (**33**, 4, p. 513) Article

A96-083 Three-Dimensional Modeling of Dual Ion-Thruster Plumes for Spacecraft Contamination. R. I. Samanta Roy and D. E. Hastings, *Massachusetts Institute of Technology* (**33**, 4, p. 519) Article

A96-084 Ion-Thruster Plume Modeling for Backflow Contamination. R. I. Samanta Roy and D. E. Hastings, *Massachussets Institute of Techonology*; and N. A. Gatsonis, *Worcester Polytechnic Institute* (**33**, 4, p. 525) Article

A96-085 Numerical Study of Spacecraft Contamination and Interactions by Ion-Thruster Effluents. R. I. Samanta Roy and D. E. Hastings, *Massachusetts Institute of Techonology*; and N. A. Gatsonis, *Worcester Polytechnic Institute* (**33**, 4, p. 535) Article

A96-086 Large-Angle Articulated Beam Truss Design Methodology Considering Offset Joint Modeling. Gregory Thorwald and Martin M. Mikulas Jr., *University of Colorado* (**33**, 4, p. 543) Article

A96-087 Review of Debris-Cloud Modeling Techniques. S. P. Barrows and G. G. Swinerd, *University of Southampton, England, UK*; and R. Crowther, *Defence Research Agency, England, UK* (**33**, 4, p. 550) Article

A96-088 Measured Spacecraft Instrument and Structural Interactions. Ansel J. Butterfield, *Bionetics Corporation*; and Stanley E. Woodard, *NASA Langley Research Center* (**33**, 4, p. 556) Article

A96-089 Development and Verification of a Cryogenic Brilliant Eyes Thermal Storage Unit. D. S. Glaister, K. D. Bell, and

M. Bello, *The Aerospace Corporation*; and F. Edelstein, *Grumman Aerospace Corporation* (**33**, 4, p. 563) Article

A96-090 Deployment of Dishes with Surface Discontinuities. G. Greschik, *University of Colorado* (**33**, 4, p. 569) Article

A96-091 Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 1: Formulation and Theory. R. J. Hung, Y. T. Long, and Y. M. Chi, *University of Alabama in Huntsville* (**33**, 4, p. 575) Article

A96-092 Slosh Dynamics Coupled with Spacecraft Attitude Dynamics Part 2: Orbital Environment Application. R. J. Hung, Y. T. Long, and Y. M. Chi, *University of Alabama in Huntsville* (**33**, 4, p. 582) Article

A96-093 Virtual Aerodynamical Coefficients of a Rotating Satellite. Joshua Ashenberg, *Technion—Israel Institute of Technology* (**33**, 4, p. 594) Engineering Note

A96-094 Analysis of Concepts for Single Stage to Orbit. Hiroki Shirasu, Jephrey L. South, and James A. Martin, *University of Alabama* (**33**, 4, p. 597) Engineering Note based on AIAA Paper 95-2953

A96-095 Device to Suppress Vortexing During Draining from Cylindrical Tanks. B. H. Lakshmana Gowda, P. J. Joshy, and S. Swarnamani, *Indian Institute of Technology* (**33**, 4, p. 598) Engineering Note

A96-096 Launch-Vehicle Simulations Using a Concurrent, Implicit Navier–Stokes Solver. Stephen Taylor and Johnson C. T. Wang, *California Institute of Technology* (**33**, 5, p. 601) Article

A96-097 Transition Regime Aerodynamic Heating of Missiles. P. K. Swaminathan and Jeff C. Taylor, *Johns Hopkins University, Applied Physics Laboratory*; Didier F. G. Rault, *NASA Langley Research Center*; and R. E. Erlandsond and C.-I. Meng, *Johns Hopkins University, Applied Physics Laboratory* (**33**, 5, p. 607) Article

A96-098 Prediction of Hypersonic Shock-Wave/Turbulent Boundary-Layer Interactions. Brian R. Smith, *Lockheed Martin Tactical Aircraft Systems* (**33**, 5, p. 614) Article

A96-099 Comparison of Catalytic Wall Conditions for Hypersonic Flow. M. Barbato, *Centre for Advanced Studies, Research and Development in Sardinia, Italy*; D. Giordano and J. Muylaert, *European Space Agency, The Netherlands*; and C. Bruno, *Università di Roma I, Italy* (**33**, 5, p. 620) Article

A96-100 High-Enthalpy and Perfect-Gas Heating Measurements on a Blunt Cone. Brian R. Hollis and John N. Perkins, *North Carolina State University* (**33**, 5, p. 628) Article

A96-101 Orbital Re-Entry Experiment Vehicle Ground and Flight Dynamic Test Results Comparison. Takashi Yoshinaga, Atsushi Tate, and Mitsunori Watanabe, *National Aerospace Laboratory, Japan*; and Takayuki Shimoda, *National Space Development Agency, Japan* (**33**, 5, p. 635) Article

A96-102 Aerodynamic Analysis of Commercial Experiment Transporter Re-Entry Capsule. William A. Wood, Peter A. Gnoffo, and Didier F. G. Rault, *NASA Langley Research Center* (**33**, 5, p. 643) Article

A96-103 Improved Missile Control Effectiveness Payoffs. Leon H. Schindel and Lisa Lam, *U.S. Naval Surface Warfare Center* (**33**, 5, p. 647) Article based on AIAA Paper 95-1898 CP955

A96-104 Computational Study of Supersonic Lateral Jet Flow Interactions. N. Qin, *Cranfield University, England, UK*; and G. W. Foster, *Defence Research Agency, England, UK* (**33**, 5, p. 651) Article based on AIAA Paper 95-2151

A96-105 In-Flight Flexure and Spin Lock-In for Antitank Kinetic Energy Projectiles. Ameer G. Mikhail, *U.S. Army Research Laboratory* (**33**, 5, p. 657) Article based on AIAA Paper 95-3429 CP958

A96-106 Method for Calculating Force Coefficients of Bodies of Revolution. A. Dubinsky and T. Elperin, *Ben-Gurion University of the Negev, Israel* (**33**, 5, p. 665) Article

A96-107 Mars Pathfinder Atmospheric Entry: Trajectory Design and Dispersion Analysis. David A. Spencer, *Jet Propulsion Laboratory, California Institute of Technology*; and Robert D. Braun, *NASA Langley Research Center* (**33**, 5, p. 670) Article based on AIAA Paper 95-379

A96-108 Interaction of Solid-Rocket Exhaust with the Atmosphere. David J. Knecht, Charles P. Pike, and Edmond Murad, *U.S. Air Force Phillips Laboratory*; and David L. A. Rall, *Photometrics, Inc.* (**33**, 5, p. 677) Article

A96-109 Space-Station Breadboard Beta Gimbal Assembly: Thermal-Vacuum Testing and Analyses. Shek-se P. Ip, *Rockwell International* (**33**, 5, p. 686) Article based on AIAA Paper 95-2018

A96-110 Numerical Study of Low-Thrust Nozzles for Satellites. S. M. Liang, K. L. Huang, and K. C. Chen, *National Cheng Kung University, Taiwan, ROC* (**33**, 5, p. 693) Article

A96-111 Space Station Based Tethered Interferometer for Natural Disaster Monitoring. Antonio Moccia, *University of Naples "Federico II," Italy*; and Marco D'Errico and Sergio Vetrella, *Second University of Naples, Italy* (**33**, 5, p. 700) Article

A96-112 Microgravity Experiment Acceleration Tolerability on Space Orbiting Laboratories. R. Monti and R. Savino, *University of Naples "Federico II," Italy* (**33**, 5, p. 707) Article

A96-113 Experimental Assessment of the Influence of Heat Pipes on a Nutating Satellite. Jehangir J. Pocha and Neil Bingham, *Matra Marconi Space, England, UK* (**33**, 5, p. 717) Article

A96-114 Visual Utility for the Localization of Corona-Accelerated Nuclei. J. Spagnuolo Jr., Cecilia Cheng, U. M. Schwuttke, and Felipe Hervias, *Jet Propulsion Laboratory, California Institute of Technology* (**33**, 5, p. 722) Article

A96-115 Small Solar Probe. J. C. Preble and A. C. Tribble, *Rockwell International Corporation* (**33**, 5, p. 729) Article

A96-116 Spacecraft Charging Anomaly on a Low-Altitude Satellite in an Aurora. P. C. Anderson and H. C. Koons, *The Aerospace Corporation* (**33**, 5, p. 734) Article

A96-117 Evaluation of the United Kingdom Ion Thruster. Mark W. Crofton, *The Aerospace Corporation* (**33**, 5, p. 739) Article

A96-118 Hypersonic Nonequilibrium Parallel Multiblock Navier–Stokes Solver. Salvatore Borrelli, Antonio Schettino, and Pasquale Schiano, *Centro Italiano Ricerche Aerospaziali* (**33**, 5, p. 748) Engineering Note

A96-119 Lower–Upper Symmetric Gauss–Seidel Scheme Exhibiting Asymmetric Vortices over Slender Bodies. Soo Jung Hwang and Oh Hyun Rho, *Seoul National University, Korea* (**33**, 5, p. 750) Engineering Note based on AIAA Paper 95-1799 CP955

A96-120 Dual Fuel Solar Thermal Stage: Ideal Analysis. Jesse F. Stewart, *University of Washington*; and James A. Martin, *University of Alabama* (**33**, 5, p. 752) Engineering Note

A96-121 Martian Surface Wind Speeds Described by the Weibull Distribution. Ralph D. Lorenz, *University of Arizona* (**33**, 5, p. 754) Engineering Note

A96-122 Navier–Stokes Calculations for Rotating Configurations: Implementation for Rockets. Sara Yaniv, *Israel Military Industries, Ltd.* (**33**, 5, p. 756) Engineering Note

A96-123 Liquid Crystal Thermography for Heat Transfer Measurement in Hypersonic Flows: A Review. G. T. Roberts and R. A. East, *University of Southampton, England, UK* (**33**, 6, p. 761) Survey Paper

A96-124 Computation of the Roll Characteristics of a Finned Projectile. Paul Weinacht and Walter B. Sturek, *U.S. Army Research Laboratory* (**33**, 6, p. 769) Article

A96-125 Predictions of Counterfire Impact Results Obtained at 12 Kilometers per Second. Raymond P. Young Jr. and Mark E. Smith, *Arnold Engineering and Development Center* (**33**, 6, p. 776) Article

A96-126 Coning Instability of Spacecraft During Periods of Thrust. R. X. Meyer, *University of California, Los Angeles* (**33**, 6, p. 781) Article

A96-127 Roll Torques Produced by Fixed-Nozzle Solid Rocket Motors. R. N. Knauber, *Lockheed Martin Vought Systems* (**33**, 6, p. 789) Article based on AIAA Paper 95-2874

A96-128 Thrust Misalignments of Fixed-Nozzle Solid Rocket Motors. R. N. Knauber, *Lockheed Martin Vought Systems* (**33**, 6, p. 794) Article based on AIAA Paper 95-2874

A96-129 Computational and Experimental Investigations of Ionization near Hypersonic Vehicles. V. A. Gorelov, M. K. Gladyshev, A. Y. Kireev, A. S. Korolev, and I. V. Yegorov, *Central Aerohydrodynamic Institute, Russia*; and V. N. Byzov, *Flight Research Institute, Russia* (**33**, 6, p. 800) Article based on AIAA Paper 95-1940

A96-130 Navier–Stokes Heating Calculations for Benchmark Thermal Protection System Sizing. David R. Olynick and W. D. Henline, *NASA Ames Research Center* (**33**, 6, p. 807) Article

A96-131 Formulation and Analysis of Launch Vehicle Maneuvering Loads. K. W. Dotson, *The Aerospace Corporation*; and S. B. Tiwari, *Lockheed Martin Corporation* (**33**, 6, p. 815) Article

A96-132 Weight Optimization for Honeycomb Radiators with Embedded Heat Pipes. David G. T. Curran and Tung T. Lam, *The Aerospace Corporation* (**33**, 6, p. 822) Article based on AIAA Paper 95-2136

A96-133 Nonlinear Dynamical Characteristics Analysis of Tethered Subsatellite in the Presence of Offset. Xingyu Gou, Xingrui Ma, and Chengxun Shao, *Harbin Institute of Technology, PRC* (**33**, 6, p. 829) Article

A96-134 Deployment and Retraction of a Cable-Driven Rigid Panel Solar Array. P. Kumar and S. Pellegrino, *University of Cambridge, England, UK* (**33**, 6, p. 836) Article based on AIAA Paper 95-1367

A96-135 Space-Based Electrostatic Antenna Design with Pointing and Beam Width Control. Larry Silverberg and Robert Stanley, *North Carolina State University* (**33**, 6, p. 843) Article

A96-136 Analysis of Nonlinear Mechanisms in a Precision Deployable Structure Using Measured Flexibility. Jason D. Hinkle and Lee D. Peterson, *University of Colorado*; and Scott W. Doebling, *Los Alamos National Laboratory* (**33**, 6, p. 848) Article based on AIAA Paper 95-1472 CP952

A96-137 Reliability Analysis of Transmission Requirements in Communication Satellite Systems. Marina Ruggieri, *University of Rome "Tor Vergata," Italy*; and Corradino Corradi, *University of L'Aquila, Italy* (**33**, 6, p. 853) Article

A96-138 Near-Optimal Low-Thrust Orbit Transfers Generated by a Genetic Algorithm. Gerald A. Rauwolf, *Hughes Space and Communications Company*; and Victoria L. Coverstone-Carroll, *University of Illinois at Urbana–Champaign* (**33**, 6, p. 859) Article

A96-139 Solar Force Modeling of Block IIR Global Positioning System Satellites. Henry F. Fliegel and Thomas E. Gallini, *The Aerospace Corporation* (**33**, 6, p. 863) Article

A96-140 Alignment and Initial Operation of an Advanced Solar Simulator. Donald A. Jaworske, Kent S. Jefferies, and Lee S. Mason, *NASA Lewis Research Center* (**33**, 6, p. 867) Article

A96-141 Five-Electron-Volt Atomic Oxygen Pulsed-Beam Characterization by Quadrupolar Mass Spectrometry. Bertrand Cazaubon, Alain Paillous, and Jean Siffre, *Centre d'Etudes et de Recherches de Toulouse–ONERA, France*; and Roger Thomas, *Laboratoire de Physique et Chimie de l'Environnement, France* (**33**, 6, p. 870) Article

A96-142 Radiation-Induced Anomalies in Satellites. E. G. Stassinopolous, *NASA Goddard Space Flight Center*; G. J. Brucker, *Radiation Effects Consultants*; J. N. Adolphsen, *Unisys*; and J. Barth, *NASA Goddard Space Flight Center* (**33**, 6, p. 877) Article

A96-143 Tradeoffs Between Science Objectives and Ground System Capability. Randii R. Wessen, *Jet Propulsion Laboratory, California Institute of Technology* (**33**, 6, p. 883) Article

A96-144 Stability of a Deformed Finite Length Inviscid Liquid Column. M. J. Lyell, *West Virginia University* (**33**, 6, p. 887) Engineering Note

A96-145 Elastic Response of Accelerating Launch Vehicles Subjected to Varying Control Pulses. Ashok Joshi, *Indian Institute of Technology* (**33**, 6, p. 889) Engineering Note
